PathScope™ | The Smart Choice

PathScope speeds imaging workflow, provides quick telepathology connections and costs a fraction of whole slide imaging solutions.
SAVE TIME!

Routine Pathology Slide Examination

Time Saved per Slide		Slides per Day		Time Saved per Day		Time Saved per Year
2 Min	X	60	=	2 Hrs	or	504 Hrs

Telepathology vs. Physical Travel

Teleconference:	🖥	:15 Seconds
Down the hall consult:	🚶	05:00 Minutes Seconds
Neighboring building consult:	🏃	20:00 Minutes Seconds
Across town consult:	🚗	01:30 Hours Minutes
Across region consult:	✈	05:00+ Hours Minutes

Increase Consults

Increasing intraoperative and needle biopsy adequacy consultations provide savings for the organization and the physician by eliminating unreimbursed secondary procedures and increasing patient satisfaction.

Pathologists and Pathologist Assistants benefit from the increased efficiency of providing their consults virtually, avoiding the unproductive trip otherwise required.
Solutions for Microscopy

- **Routine Anatomical Pathology**
- **Needle Biopsy Consults**
- **Teaching and Training**
- **Frozen Section Consults**
- **Tumor Boards**

Easy to Implement

SPOT Imaging Solutions has developed turnkey solutions with configuration options to support your facility's unique hardware and software infrastructure. The result is quick installation and optimized performance.

Professional Documentation

Professional documentation is the foundation of quality assurance and process improvement as well as the basis of how you are perceived by your patients, referring physicians and legal establishment.
