## INSTALLATION INSTRUCTIONS

#### **USB Key/Dongle Identification**

If you have more than one USB key/dongle, make sure you are using the right one for the e-mail activation codes, as follows:

- **1.** Insert the USB key/dongle.
- 2. Start SPOT 5.2 Software.
- 3. If you see the trial warning box, click the "Continue" button.
- **4.** Windows only: Use the "About SPOT..." command from the "Help" menu.
- 5. Mac only: Use the "About SPOT..." command from the "SPOT" menu.
- 6. In the resulting window, look for the line that identifies the "License ID." There may be more than one. If one of the license IDs listed matches the license ID shown in your email, you have inserted the correct USB key/dongle.

Software: SPOT Advanced - trial mode SPOT Software Build Details: Version: 5.2 Suid 12518, Type: Release x86, Date:08/19/14 SPOT Casered Support Eliseu Build Details; Version: 5.2.1 Build 12618, Type: Release x86, Date:08/19/14 License Details: Peripheral Device Control (active as jial) Extended Depth of Focus (active as trial) Extended TWAIN Interface (ovaliable as trial)

(or equivalent x86 SSE2 processor) Mac: OS 10.8 to 10.10

or greater, 1 GB RAM or greater Mac: Intel only 1 GB RAM or greater

Windows: 1 GHz Pentium 4

#### Before You Install

- If you are upgrading from SPOT 4.5 Software or later, and you are installing SPOT 5.2 Software on a different computer, you can transfer your settings from the old computer to the new one. On the old computer, start SPOT Software and use the Setup menu to access the dialogs of the settings you'd like to transfer. Then, press the "Export" button to export the settings to a file. On the new computer, start SPOT 5.2 Software, use the Setup menu to access the same dialogs, and press the "Import" button to import the file(s) that you saved. Note that to import or export Image Setups, your SPOT camera will need to be connected to the old computer and powered on.
- Make sure you know the name and password for an administrator account. If you need help with this, contact your network administrator.
- Close any applications that are running.
- If you have a SPOT camera, make sure it is available, in case the installer asks you to connect it during the installation.
- DO NOT RUN ANY VERSION OF SPOT SOFTWARE UNTIL AFTER RESTARTING THE COMPUTER AT THE END OF INSTALLATION.

Note: If you have an earlier version of SPOT Software installed on your computer, it will still be available for use after you install the new version.

(Screen shots are representative only. Actual dialogs will vary depending on your system.)

- 1. Double-click the installer file that you downloaded, or insert the SPOT Software CD into your computer's CD-ROM drive. The CD-based installer should launch automatically. If it does not launch, double-click the "setup" application on the root of the CD.
- 2. Some computers will ask you to allow the installer to make changes to the computer. Click "Yes" to proceed.
- 3. The installer will guide you through the rest of the process. Follow all of the instructions.
- 4. You may be asked if you want to install software from Diagnostic Instruments. Click "Install" or "Continue Anyway" to proceed.
- 5. If you are asked if you want to restart your system, click "No." You will restart later in step 7.
- 6. When asked to connect the USB key/dongle, make sure it is firmly connected to a USB port.
