PathScope™ Presentation | Practical

PathScope speeds imaging workflow, provides quick telepathology connections and costs a fraction of whole slide imaging solutions.

SAVE TIME!

Average Cost of 1 minute in a Tumor Board

Avg # of Doctors		Average \$ /Hr.		Avg # of Assistants		Avg \$/Hr.	=	\$/Hr.	
12	X	\$186/HR	+	4	X	\$50/HR	=	\$2,433.60/HR	
								or	\$/Min. \$40.56

Clear Diagnoses

Your diagnosis should not suffer from questions of image quality. Clear Clean representations of your samples will insure that discussions focus on histology and not on problems with fuzzy low resolution images. HD and Ultra HD 4K remove the doubt that the image artifacts are representative of the data.

Professional Presentation

Referral Doctors will be reassured of the quality of your practice through the cues projected via the professional presentations of your case slides.

SPOT high resolution, high quality images ensure that you present your best image of your case and your practice.

KISS | Keep It Simple Solution

EASY

SUCCESS!

Ensuring your colleagues and students get the most from your sessions, you need a system that is simple to run and reliably on line when you need it. The solutions for many situations is the simple high quality projection of images to be shared by the attendees.

SPOT HDVision-M and Ultra HDVision-M* provide that environment.

*Available Q1 2015

Applications

- Tumor Board Case reviews
- Class Lectures
- Lab Sessions
