

# Looking for a Secure and Easy Telepathology Solution?

**Secure and Easy to Use**

**PathCast™ is Designed Specifically for Pathology and Clinical Consultation!**

## Save Time

**Eliminate Unreimbursed Travel and Wait Times.**

- Users connect and engage only when needed
- Quickly review samples and provide opinion
- Immediately return back to productive slide examination

## Telepathology vs. Physical Travel

**SAVE TIME!**

## Support Multiple Procedures Simultaneously

PathCast's virtual connections lets you click between procedures, stretching your coverage during peak demand periods.

## Easy Meeting Connections

**Connect Quickly Without Frustration**

**It's as Easy as...**

- Select a colleague's name
- Click "Request Meeting"
- Colleague clicks "Accept"
- The meeting is started

## Telepathology | One-click connect

**PathCast™ Makes Clinical Consults Easy and Secure**

## Rich Communication

PathCast is a virtual environment with...

- Interactive Live Video
- VoIP Audio
- Remote Cursor and Keyboard Control

## Secure Architecture

PathCast is built from the ground up to eliminate IT security threats.

- PathCast™ is a proprietary, clinical only application
- Behind Firewall implementation eliminates Firewall exceptions
- VPN connections for external users' access
- Contact Server manages participant validation
- IT registration of new users limits spoofing
- Clients only respond to authorized requests

**Auto-Connect  
Wake On LAN**

**NAT  
TRAVERSAL**

Dot-264 Compression

## IT Manageability

PathCast's lean design executes its mission without frivolous features that clutter the interface and increase the IT maintenance burden.

- Latest Dot-264 compression technology eases network loading.
- Pier to Pier maintains Video Transmission Performance
- Half Duplexed audio echo suppression and microphone auto-gain leveling eliminate speaker feedback.
