Connection

Pathology
Department

Save Time

Eliminate Unreimbursed Travel and Wait Times.

- Users connect and engage only when needed
- Quickly review samples and provide opinion
- Immediately return back to productive slide examination

Telepathology vs. Physical Travel

SAVE
TIME!

Teleconference:		15 Seconds
Down the hall consult:		05:00 Minutes
Neighboring building consult:		20:00 Minutes
Across town consult:		01:30 Hours
Across region consult:		05:00 + Hours

Support Multiple Procedures Simultaneously

PathCast's virtual connections lets you click between procedures, stretching your coverage during peak demand periods.

Easy Meeting Connections

Connect Quickly Without Frustration

It's as Easy as...

- Select a colleague's name
- Click "Request Meeting"
- Colleague clicks "Accept"
- The meeting is started

Telepathology | One-click connect

PathCast™ Makes Clinical Consults Easy and Secure

Rich Communication

PathCast is a virtual environment with...

- Interactive Live Video • VoIP Audio • Remote Cursor Control • Chat Channel

Secure Architecture

PathCast is built from the ground up to eliminate IT security threats.

- PathCast's security is derived from its restricted NAT traversal capability.
- PathCast does not support auto-connection functions, eliminating remote initiation of connections.
- External LAN users are supported via known entity, registered VPN connections.

**Auto-Connect
Wake On LAN**

**NAT
TRAVERSAL**

Dot-264 Compression

IT Manageability

PathCast's lean design executes its mission without frivolous features that clutter the interface and increase the IT maintenance burden.

- Latest Dot-264 compression technology eases network loading.
- Pier to Pier and Multi-Cast transmission eliminates meeting servers while optimizing traffic.
- Duplexed audio echo suppression and microphone auto-gain leveling eliminate speaker feedback.
