# SPOT Basic
Microscopy Software

Take a closer look.

SPOT Basic is a well featured and easy to use microscopy software that makes microscopy imaging easy and intuitive.

Windows 10

SPOT Basic is included with every SPOT camera purchase.

Idea 3 & 5Mp   Insight 5 & 12Mp   RT sCMOS 5MP

Key Features:

- Live Preview with Acceleration

- Presentation Mode for Live and Captured Image Presentation

- Live Focus Gauge

- Image Resolution Settings

- Image Sub-Region of Interest with Aspect Ratio Settings

- Digital Zoom, Pan and Magnifier Tools

- Auto-Exposure with Auto Brightness Adjust, Manual Override and Spot Metering

- Individual User, Live and Capture Settings with Settable Links

- Gamma, Contrast, Saturation, and Color Temperature settings

- Auto/Manual White Balance

- ICC Color Correction

- Flat Field Correction

- Image Post Processing Adjustments: Filters, Crops, Orientation

- Digital Reticle Overlays with Construction Tools

- Annotation and Measurement Tools with Measurement Export

- Image Layers with Flattening for Export

- Reference Mark Tool

- Time Lapse Capture, Playback and Export Module

- Image Auto-Save in JPEG, TIFF-JPEG, TIFF, BIG-TIFF, BITMAP, PICT

- Image Notes and Acquisition Information

- Report Generator Module with Spell Checking and Autotype Shorthand

- In-Application Help Menu

- Free On-line Training Modules

- Supports:
  WIN OS 7 sp1 / 8.1 / 10
  Mac OS 10.8 - 10.14

Why are SPOT Cameras and SPOT Basic Software So Popular?

SPOT Imaging is a 52 year old company that specializes in scientific imaging solutions. We have been building camera systems since 1997 and we are the first camera company to bring color digital cameras to the microscopy market.

SPOT Cameras and software are easy to install, learn and use, and they provide the benchmark in image quality, enhancing your professional presentation to your peers.
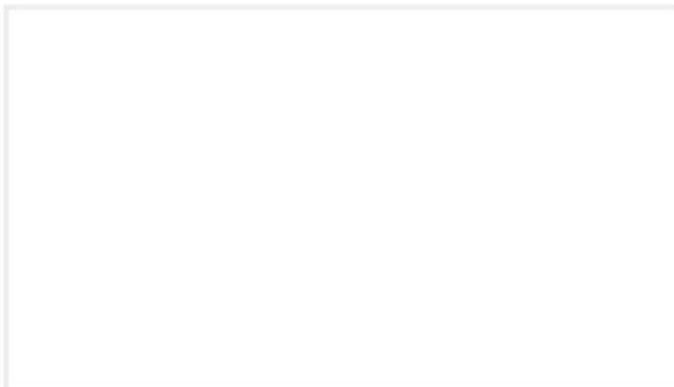

SPOT Microscopy packages are a complete integrated system of camera, data cables, software and C-mount microscope adapter ensuring a complete, integrated imaging solution that fits your application and your microscope.

SPOT Basic's capabilities can be expanded with the SPOT Advance Software with it's Custom Macro programming, Custom Dialog Interface design, as well as, it's modules for High Dynamic Range, Quantitative Imaging, Extended Depth of Focus, Peripheral Device Control, Live Image Overlay, Third Party Interfaces and Secure Teleconferencing.

Pathology customers can migrate to a fully integrated imaging environment with workflows and image systems optimized for each Pathology Imaging Task: Cytology ROSE, Frozen Section, Gross Dissection, Slide Examination, Tumor Board and Slide Review along with bulk barcode scanning of cassettes and slides.
