

The Standard for Pathology Imaging

Helping pathology partners develop roadmaps

- Professional images from streamlined workflows
- Shared central image archive
- Secure telepathology interface
- Synchronized LIS connectivity

Based on the principles of

- Practical, budget-positive solutions that pay for themselves
- Integrated, stepwise implementation
- Fitting your existing infrastructure of equipment and software
- Solid performance with nearly years of problem-solving experience

PathSuite Professional 3.1

Driving Efficiency in Digital Pathology

SPOT Imaging’s digital hardware is just the beginning. **PathSuite Professional 3.1** elevates your workflow with powerful tools for image capture, annotation, and file management—all in a platform designed for seamless integration and rapid user adoption. Its intuitive interface streamline the acquisition of images, enhancing operator productivity.

Automate Your Processing

Engineered by pathologists, **PathSuite Pro** automates many of the repetitive processes that can slow down the capture and annotation of sample images. How will **PathSuite Pro** improve your efficiency?

Simple, Unified Interface

A single, icon-driven interface supports both gross and microscopy imaging, enabling users to capture, annotate, and archive images with minimal effort, from one workstation. One-click video and audio recording, image cropping, and annotation tools simplify comprehensive documentation.

Automated Metadata

Sample barcode scanning enables automatic population of metadata, ensuring consistency with labeling standards and supporting accurate case tracking. Easily maintain organized, compliant records with minimal manual entry.

Comprehensive Annotation Tools

Layered annotations, auto-numbering, image stamps, counting tools and calibration features help standardize image notation for greater clarity among all audiences. publication and reporting, enhancing clarity and professionalism.

Professional Presentation Matters

The quality of your lab’s documentation directly impacts how your organization is perceived by patients, referring physicians and legal stakeholders.

PathSuite Professional ensures every image elevates the stature of your institution.

Integrate Images, Video and Audio

Automatic case-based filing of images, video and audio ensures comprehensive documentation of case information. Each case filmstrip consolidates images, assuring they are readily available during reviews or sign-out.

Consult-Ready Flexibility

Optional **PathCast®** telepathology integration enables secure, remote consultation, reducing the need for in-person reviews.

Proven Reliability

Trusted by over 1,000 laboratories worldwide, **PathSuite Professional** is a proven solution for improving productivity and controlling costs.

SPOT Portfolio of Solutions

Consolidating all changes into: Designed with efficiency in mind, **PathSuite Professional** integrates tightly with **SPOT Imaging** hardware to reduce handling and speed up workflows, helping your lab do more with less.

PathScope™ — Case Sign-Out
